An NVQ level 2 certified Grip with own equipment based in London.

I am just as comfortable taking notes and direction from Oscar winning Directors and planning complicated shots with DoP's on a high end feature as I am to working swiftly to get a shot on a time constrained TV drama before the light fades. I can manage and co-ordinate a team of individuals in order to help create a shared vision.

I work fast and efficiently but always with the utmost care for safety whilst achieving what is required to get the shot. I aim to make whatever production I work on a better, safer and happier set.
