Key Grip: Pete Nash
Key Grip: Johnny Donne

Other:

Screen Skills grip pathway course

References:

Pat worked with me across a number months in 2021.

Working on a high budget TV shoot, we had many big days with lots of moving parts and equipment including 3 camera low loader days, 30ft and 50ft technos, building multijibs many stories up buildings, shadow trackers.

Pat was a great team member to have around, positive, professional and knowledgeable, and made working relationships within the department and the broader crew. I'd gladly have him on a job with me, and I've put him forward for a number of jobs with others.

Alex Kelleher

I have worked with Patrick on four different productions since first meeting him in June 2021, including two HETV, a commercial, and currently a feature film. The productions have been equipment heavy, ranging from cranes and dollies to tripod and handheld, and no matter what the job entails Patrick always rises to the occasion. He is hard working, have brilliant work ethics, a very detailed and all around knowledge of the equipment and he is always keen to learn.

Patrick have an eye for detail, and is always happy to lend a hand to anybody in need of help, while staying very safety conscious and with a good set etiquette mindset.

I truly believe Patrick has a bright future if he continues in the way he has started, and I am happy to provide him with any support he need. He is a star trainee and is a great asset to our department.
