While completing my HND documentary photography in 1992, I worked on a few student films on set & in the edit suite. I've always had a keen interest in film and in 1999 I jumped at an opportunity to train as a grip while I was living in Berlin. This led to working on long running TV series in Berlin. In between jobs in the film industry I continued working as a freelance photographer shooting mostly travel photography. I now work solely as a grip in the UK film industry on commercials & feature films.
