Personal statement

I am an adaptable and responsible trainee seeking an opportunity to build my skills within a fast-paced production environment. My work on Jurassic World: Rebirth, Warfare, Ghostwriter, Dear England and EastEnders has strengthened my set etiquette, work ethic and practical understanding of on-set operations. I have experience organising equipment, protecting kit in varied weather conditions, and safely moving large, heavy gear around set. Confident working in both studio and location settings, I am eager to develop further in entry-level roles within the Grips or Locations departments and continue learning new skills.
